

INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference	FOR FURTHER see Notification (Form PCT/ISA/	of Transmittal of International Search Report 220) as well as, where applicable, item 5 below.
International application No.	International filing date (day/month/year)	(Earliest) Priority Date (day/month/year)
PCT/CA 00/00771	30/06/2000	30/06/1999
Applicant		
MCNAUGHTON, Alan, G. et al	1.	
This International Search Report has beer according to Article 18. A copy is being tra	n prepared by this International Searching Aut Insmitted to the International Bureau.	hority and is transmitted to the applicant
This International Search Report consists X It is also accompanied by	of a total of5sheets. a copy of each prior art document cited in this	report.
Basis of the report		
	nternational search was carried out on the ba ess otherwise indicated under this item.	sis of the international application in the
the international search was Authority (Rule 23.1(b)).	as carried out on the basis of a translation of t	he international application furnished to this
was carried out on the basis of the	e sequence listing:	nternational application, the international search
	nal application in written form. rnational application in computer readable form	n.
	this Authority in written form.	•••
	this Authority in computer readble form.	
the statement that the sub international application as	sequently furnished written sequence listing d s filed has been furnished.	loes not go beyond the disclosure in the
the statement that the info furnished	rmation recorded in computer readable form is	s identical to the written sequence listing has been
2. X Certain claims were four	nd unsearchable (See Box I).	
3. Unity of invention is lack	king (see Box II).	
4. With regard to the title ,		
X the text is approved as sub	omitted by the applicant.	
the text has been establish	ned by this Authority to read as follows:	
- 1		
5. With regard to the abstract,		
the text is approved as subthe text has been establish within one month from the	omitted by the applicant. ned, according to Rule 38.2(b), by this Authori date of mailing of this international search rep	ty as it appears in Box III. The applicant may, port, submit comments to this Authority.
6. The figure of the drawings to be publi	shed with the abstract is Figure No.	1
$oxed{X}$ as suggested by the applic	cant.	None of the figures.
because the applicant faile	ed to suggest a figure.	
because this figure better	characterizes the invention.	

B x I Observati ns wher certain claims were found unsearchable (Continuati n of item 1 f first sheet)
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
2. X Claims Nos.: 1-226 (all claims partially) because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically: See FURTHER INFORMATION sheet PCT/ISA/210
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)
This International Searching Authority found multiple inventions in this international application, as follows:
As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remark in Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.2

Claims Nos.: 1-226 (all claims partially)

The term "TEM" ("transaction execution machine") has no generally well recognised meaning in the art. It seems to encompass, amongst very many other things, both known ATM's, and, for example, home PC's (see applicant's list at pages 14-15 of the description). A customer having two Internet bank accounts, for instance, and using his or her PC at different times to access the own different bank accounts, would be operating a transaction execution system according to the application, since in response to his secure log-in data, the banks would use his PC (a shared TEM) to display their own dynamic branding (the information contained in their web pages).

More generally, an Internet user accessing at different times two different web-sites requiring identification (for example a web-site directed to investment information, and another directed to a subscription-only news service) would also be operating a transaction execution system according to the application. The user's TEM (the browser on the user's PC) would be assuming "multiple personalities" within the meaning of the application. This extremely common situation would appear to read directly onto claims 1, 2, 60, 61 and 124 of the application.

Indeed, the description of the application is so generally worded, and the claims are so generally and broadly drafted, that the subject-matter of the claims is anticipated by so many common situations that an exhausive listing of them would be impossible. As a result of this generality of expression, the subject-matter for which protection might legitimately be sought (PCT Art 6) is impossible to determine, so that a meaningful complete search of the whole of the claims is rendered impossible. This lack of clarity about the subject-matter which might legitimately be claimed is compounded by the fact that there are 245 (and not the purported 226) claims at presently on file, which means that the application does not meet the clarity and conciseness requirements of PCT Art 6. (It is noted in passing that the use of alphabetic suffixes to claim numbers (as in claim 177A) is not in accordance with PCT Rule 6.1(b))

In addition, claim 124 is so lacking in clarity that a meaningful search of this claim, and the claims dependent upon it, is impossible. Although it purports to be directed to a brandable TEM, this claim defines not the TEM itself but its relationship to a communications system and a configuration system (p.15-17 in the description). Similar comments apply to claims 224 to 226 which contain no technical features directed to the computer media themselves.

Consequently, a meaningful search of the whole of the scope of the claims has proved impossible. Instead, a partial search has been carried out on the following subject-matter: Remote transaction system using ATM, PC or internet for home banking, where a tailored user interface is provided

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

for each financial institute (bank). A user registered with financial institute A will always get A's interface even if consulting an ATM of financial institute B. It has been hard to envisage how the applicant might want to refocus his application. If a refocus occurs which is not within the scope of the search a new search should be asked for.

Finally, and independently of the above, it is noted that claims 1-208 of the present application are identical to claims 1-208 of co-pending application PCT/CA/00772, of same date and from the same applicant, and claiming the same priority as the present application. It is an accepted principle of all patent systems that two patents shall not be granted to the same inventor for the same invention, and the applicant is advised that abandonment of one or other of the applications, or amendment of one or other of the applications so that they no longer claim the same matter, may very well prove necessary in any further prosecution.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
